TIGER OF SWEDEN'S FIBRE STANDARD

THIS LIST IS OUR WORKING TOOL FOR HOW TO MAKE THE CONTENT OF OUR COLLECTIONS AS RESPONSIBLE AND LONG-LASTING AS POSSIBLE.

The categorization of fibers are divided into categories from 1–4

1. Best in class: Natural fibres that are recycled, fast renewing and/or biodegradable as well as responsible manmade innovations.
2. Better: Synthetic and manmade fibres that are recycled, certified fibres and todays better fibre choice.
3. Conventional: Traditional fibres were better alternative are available, we aim to phase these out by latest 2030.
4. To be phased out: Fibres we aim to urgently out phase due to high process chemical usage, water usage and lack of controlled over animal welfare.

	1 BEST IN CLASS FIBRES	**2** BETTER FIBRES	**3** CONVENTIONAL FIBRES	**4** FIBRES BEING OUTPHASED
ANIMAL FIBRES	Recycled Wool	Organic Wool/RWS/ZQ	Wool	
		Alpaca/Traceable mohair		Mohair
	Recycled Cashmere	Yak		Cashmere
		Organic silk	Silk	
	Recycled Down	Fake down	RDS Down	
CELLULOSE FIBRES	Recycled Cotton	Organic Cotton/BCI Cotton		Cotton
	Ramie	Organic Linen/Linen (natural)	Linen (chemical)	
		Jute		
		Straw		
MAN MADE CELLULOSICS	Circulose™ Re:newcell			
		Traceable Acetate		Acetate
		Soalon™ Tri-acetate		
		Orange Fiber	Lenzing/Enka® Viscose	
	TENCEL™ Lyocell with REFIBRA™ technology	Organic Hemp/Hemp		Viscose
		LENZING™ ECOVERO™		
		TENCEL™ Lyocell	Modal	
		Cupro		
		TENCEL™ Modal		
SYNTHETICS		Recycled Polyester		Polyester
		Recycled Polyamide		Polyamide
				Acrylic
		Roica		Elastane
OTHER		Recycled Rubber	Natural Rubber	Rubber

MORE SUSTAINABLE	LESS SUSTAINABLE
