

TIGER OF SWEDEN'S FIBRE OCH LEATHER STANDARD

This list is our working tool for how to make the content of our collections as responsible and long-lasting as possible.

1. Best in class: certified, recycled, regenerative, fast renewing and/or biodegradable as well as responsible manmade innovations that contributes to a circular economy. our aim is to increase our use of improved and best in class options every season.
2. Better: Natural, Synthetic and manmade fibres that are certified and has less impact than conventional fibres. our aim is to increase our use of improved and best in class options every season.
3. Conventional: Traditional fibres/leathers/processes where better alternative are available. we will phase out these fibres in long-term.
4. BANNED: Fibres WE DO NOT WORK WITH.

we label our products AS RESPONSIBLE CHOICE when they contain over 50% of best in class fibres or improved fibres.

ongoing work:

We understand that working with textile materials and leather is an ongoing process that requires a progressive approach and that materials need to be evaluated regularly to make sure we are up to date with the latest science, best practices and knowledge. our preferred fibre and leather list will be updated as soon as we have new information.
